Algebraic Cycles and Motives: Volume 1 (London Mathematical Society Lecture Note Series)

Algebraic Cycles and Motives: Volume 1 (London Mathematical Society Lecture Note Series)

Algebraic Cycles and Motives: Volume 1 (London Mathematical Society Lecture Note Series)
Algebraic geometry is a central subfield of mathematics in which the study of cycles is an important theme. Alexander Grothendieck taught that algebraic cycles should be considered from a motivic point of view and in recent years this topic has spurred a lot of activity. This 2007 book is one of two volumes that provide a self-contained account of the subject. Together, the two books contain twenty-two contributions from leading figures in the field which survey the key research strands and present interesting new results. Topics discussed include: the study of algebraic cycles using Abel-Jacobi/regulator maps and normal functions; motives (Voevodsky's triangulated category of mixed motives, finite-dimensional motives); the conjectures of Bloch-Beilinson and Murre on filtrations on Chow groups and Bloch's conjecture. Researchers and students in complex algebraic geometry and arithmetic geometry will find much of interest here.

From reader reviews:

Shanika Jeans:

Why? Because this Algebraic Cycles and Motives: Volume 1 (London Mathematical Society Lecture Note Series) is an unordinary book that the inside of the reserve waiting for you to snap that but latter it will distress you with the secret the item inside. Reading this book beside it was fantastic author who have write the book in such awesome way makes the content on the inside easier to understand, entertaining approach but still convey the meaning fully. So , it is good for you because of not hesitating having this anymore or you going to regret it. This unique book will give you a lot of benefits than the other book get such as help improving your skill and your critical thinking means. So , still want to hesitate having that book? If I were you I will go to the book store hurriedly.

Wayne Ross:

Playing with family inside a park, coming to see the marine world or hanging out with close friends is thing that usually you could have done when you have spare time, after that why you don't try matter that really opposite from that. Just one activity that make you not experience tired but still relaxing, trilling like on roller coaster you already been ride on and with addition associated with. Even you love Algebraic Cycles and Motives: Volume 1 (London Mathematical Society Lecture Note Series), you can enjoy both. It is great combination right, you still wish to miss it? What kind of hang type is it? Oh can happen its mind hangout guys. What? Still don't buy it, oh come on its known as reading friends.

Raymond Phillips:

Within this era which is the greater man or who has ability in doing something more are more treasured than other. Do you want to become considered one of it? It is just simple solution to have that. What you have to do is just spending your time very little but quite enough to enjoy a look at some books. One of many books in the top checklist in your reading list is definitely Algebraic Cycles and Motives: Volume 1 (London Mathematical Society Lecture Note Series). This book that is qualified as The Hungry Slopes can get you closer in turning out to be precious person. By looking right up and review this reserve you can get many advantages.

Jesse Eriksen:

A lot of book has printed but it takes a different approach. You can get it by world wide web on social media. You can choose the most effective book for you, science, amusing, novel, or whatever simply by searching from it. It is called of book Algebraic Cycles and Motives: Volume 1 (London Mathematical Society Lecture Note Series). Contain your knowledge by it. Without leaving behind the printed book, it might add your knowledge and make an individual happier to read. It is most essential that, you must aware about reserve. It can bring you from one spot to other place.
