An Enlarged Europe: Regions in Competition? (Regions and Cities)

The political and economic geography of Europe is changing - the European Community is expanding its boundaries towards EFTA and is resuming a closer association with Central and Eastern European regions engaged in radical restructuring. As EC integration accelerates there is the prospect of intensified inter-regional competition. This book, divided into five parts, examines in detail the changes and the challenge for policy makers. The introduction draws out the central themes of the book, addressing EC regional performance and future indicators, the enlargement and changing map of Europe and the implications for the EC of Eastern European changes.

The second part deals with EC issues, particularly focusing on the economic and spatial impact of European integration. Part 3 addresses Eastern European issues, and Part 4 covers the Peripheral Regions. The final part is devoted to a policy debate, concluding with a policy agenda for the forthcoming decade.
