Climate Change, Air Pollution and Global Challenges: Chapter 18. Impacts of Air Pollution and Climate Change on Plants: Implications for India (Developments in Environmental Science) Vivek Pandey, Elina Oksanen, Nandita Singh, Chhemendra Sharma

The air pollution and greenhouse gas emission problem has been exacerbated in India due to large population increase and rapid economic growth. The Indo-Gangetic Plains of Northern India, one of the most fertile regions of the world, has become one of the most polluted regions. The region has emerged as a 'hot spot' for air pollution, especially ozone (O₃), threatening food-grain production. The air quality data show large parts of India suffering from high pollution load. Unfortunately, O₃ monitoring is still in its infancy. There are reports of O₃-caused yield and biomass losses in crops ranging between 10% and 51%, offsetting a significant portion of the Gross Domestic Productivity growth rate. There are no O₃ experiments conducted with Indian tree species, but the crop losses suggest that O₃ may have a deleterious impact also in long-lived trees in the Indian area. There is a critical need to study how O₃ will impact trees and forest ecosystems.

From reader reviews:

Henry Barba:

The book Climate Change, Air Pollution and Global Challenges: Chapter 18. Impacts of Air Pollution and Climate Change on Plants: Implications for India (Developments in Environmental Science) can give more knowledge and also the precise product information about everything you want. So just why must we leave the best thing like a book Climate Change, Air Pollution and Global Challenges: Chapter 18. Impacts of Air Pollution and Climate Change on Plants: Implications for India (Developments in Environmental Science)? Some of you have a different opinion about publication. But one aim which book can give many info for us. It is absolutely correct. Right now, try to closer with your book. Knowledge or data that you take for that, you may give for each other; it is possible to share all of these. Book Climate Change, Air Pollution and Global Challenges: Chapter 18. Impacts of Air Pollution and Climate Change on Plants: Implications for India (Developments in Environmental Science) has simple shape but you know: it has great and big function for you. You can appear the enormous world by available and read a publication. So it is very wonderful.

Brandy Brobst:

Reading a book for being new life style in this calendar year; every people loves to read a book. When you read a book you can get a large amount of benefit. When you read textbooks, you can improve your knowledge, since book has a lot of information on it. The information that you will get depend on what types of book that you have read. If you would like get information about your examine, you can read education books, but if you act like you want to entertain yourself you can read a fiction books, this kind of us novel, comics, as well as soon. The Climate Change, Air Pollution and Global Challenges: Chapter 18. Impacts of Air Pollution and Climate Change on Plants: Implications for India (Developments in Environmental Science) provide you with new experience in reading through a book.

John Martindale:

In this era globalization it is important to someone to acquire information. The information will make someone to understand the condition of the world. The health of the world makes the information simpler to share. You can find a lot of sources to get information example: internet, magazine, book, and soon. You can view that now, a lot of publisher this print many kinds of book. Typically the book that recommended for your requirements is Climate Change, Air Pollution and Global Challenges: Chapter 18. Impacts of Air Pollution and Climate Change on Plants: Implications for India (Developments in Environmental Science) this publication consist a lot of the information of the condition of this world now. That book was represented how do the world has grown up. The dialect styles that writer require to explain it is easy to understand. The actual writer made some analysis when he makes this book. That is why this book appropriate all of you.

Mark Adair:

As we know that book is significant thing to add our know-how for everything. By a publication we can know everything we really wish for. A book is a pair of written, printed, illustrated or perhaps blank sheet. Every year was exactly added. This reserve Climate Change, Air Pollution and Global Challenges: Chapter 18. Impacts of Air Pollution and Climate Change on Plants: Implications for India (Developments in Environmental Science) was filled with regards to science. Spend your spare time to add your knowledge about your research competence. Some people has various feel when they reading the book. If you know how big advantage of a book, you can truly feel enjoy to read a publication. In the modern era like at this point, many ways to get book that you wanted.
