Envelopes and Sharp Embeddings of Function Spaces (Chapman & Hall/CRC Research Notes in Mathematics Series) Dorothee D. Haroske

Until now, no book has systematically presented the recently developed concept of envelopes in function spaces. Envelopes are relatively simple tools for the study of classical and more complicated spaces, such as Besov and Triebel-Lizorkin types, in limiting situations. This theory originates from the classical result of the Sobolev embedding theorem, ubiquitous in all areas of functional analysis.

Self-contained and accessible, **Envelopes and Sharp Embeddings of Function Spaces** provides the first detailed account of the new theory of growth and continuity envelopes in function spaces. The book is well structured into two parts, first providing a comprehensive introduction and then examining more advanced topics. Some of the classical function spaces discussed in the first part include Lebesgue, Lorentz, Lipschitz, and Sobolev. The author defines growth and continuity envelopes and examines their properties. In Part II, the book explores the results for function spaces of Besov and Triebel-Lizorkin types. The author then presents several applications of the results, including Hardy-type inequalities, asymptotic estimates for entropy, and approximation numbers of compact embeddings.

As one of the key researchers in this progressing field, the author offers a coherent presentation of the recent developments in function spaces, providing valuable information for graduate students and researchers in functional analysis.

From reader reviews:

Jonathan Head:

What do you regarding book? It is not important together with you? Or just adding material when you really need something to explain what yours problem? How about your free time? Or are you busy individual? If you don't have spare time to do others business, it is give you a sense of feeling bored faster. And you have spare time? What did you do? Every person has many questions above. They have to answer that question because just their can do that will. It said that about book. Book is familiar in each person. Yes, it is appropriate. Because start from on pre-school until university need this kind of Envelopes and Sharp Embeddings of Function Spaces (Chapman & Hall/CRC Research Notes in Mathematics Series) to read.

Samuel Salamanca:

In this 21st century, people become competitive in each way. By being competitive currently, people have do something to make these survives, being in the middle of often the crowded place and notice through surrounding. One thing that at times many people have underestimated the item for a while is reading. Yes, by reading a book your ability to survive enhance then having chance to stand than other is high. For you who want to start reading any book, we give you this particular Envelopes and Sharp Embeddings of Function Spaces (Chapman & Hall/CRC Research Notes in Mathematics Series) book as nice and daily reading e-book. Why, because this book is more than just a book.

Nancy Bowers:

The reserve with title Envelopes and Sharp Embeddings of Function Spaces (Chapman & Hall/CRC Research Notes in Mathematics Series) contains a lot of information that you can discover it. You can get a lot of gain after read this book. That book exist new understanding the information that exist in this publication represented the condition of the world now. That is important to yo7u to learn how the improvement of the world. This kind of book will bring you throughout new era of the globalization. You can read the e-book on the smart phone, so you can read the idea anywhere you want.

Karen Bergeron:

Do you like reading a e-book? Confuse to looking for your favorite book? Or your book had been rare? Why so many question for the book? But just about any people feel that they enjoy regarding reading. Some people likes looking at, not only science book but in addition novel and Envelopes and Sharp Embeddings of Function Spaces (Chapman & Hall/CRC Research Notes in Mathematics Series) or maybe others sources were given know-how for you. After you know how the truly amazing a book, you feel would like to read more and more. Science publication was created for teacher as well as students especially. Those publications are helping them to bring their knowledge. In some other case, beside science guide, any other book likes Envelopes and Sharp Embeddings of Function Spaces (Chapman & Hall/CRC Research Notes in Mathematics Series) to make your spare time considerably more colorful. Many types of book like this.
