Mechatronics and Intelligent Systems for Off-road Vehicles

Francisco Rovira Más, Qin Zhang, Alan C. Hansen

Mechatronics and Intelligent Systems for Off-road Vehicles Francisco Rovira Más, Qin Zhang, Alan C. Hansen

Rapid developments in electronics over the past two decades have induced a move from purely mechanical vehicles to mechatronics design. Recent advances in computing, sensors, and information technology are pushing mobile equipment design to incorporate higher levels of automation under the novel concept of intelligent vehicles. *Mechatronics and Intelligent Systems for Off-road Vehicles* introduces this concept, and provides an overview of recent applications and future approaches within this field. Several case studies present real examples of vehicles designed to navigate in off-road environments typically encountered by agriculture, forestry, and construction machines. The examples analyzed describe and illustrate key features for agricultural robotics, such as automatic steering, safeguarding, mapping, and precision agriculture applications.

The eight chapters include numerous figures, each designed to improve the reader's comprehension of subjects such as:

- automatic steering systems;
- navigation systems;
- vehicle architecture;
- image processing and vision; and
- three-dimensional perception and localization.

Mechatronics and Intelligent Systems for Off-road Vehicles will be of great interest to professional engineers and researchers in vehicle automation, robotics, and the application of artificial intelligence to mobile equipment; as well as to graduate students of mechanical, electrical, and agricultural engineering.

From reader reviews:

Vivian Bennett:

Book is to be different for every single grade. Book for children till adult are different content. We all know that that book is very important normally. The book Mechatronics and Intelligent Systems for Off-road Vehicles was making you to know about other understanding and of course you can take more information. It is quite advantages for you. The publication Mechatronics and Intelligent Systems for Off-road Vehicles is not only giving you considerably more new information but also being your friend when you sense bored. You can spend your own personal spend time to read your publication. Try to make relationship with the book Mechatronics and Intelligent Systems for Off-road Vehicles. You never really feel lose out for everything when you read some books.

Lawrence Howe:

Information is provisions for people to get better life, information presently can get by anyone on everywhere. The information can be a know-how or any news even a problem. What people must be consider when those information which is inside the former life are hard to be find than now could be taking seriously which one is appropriate to believe or which one the particular resource are convinced. If you get the unstable resource then you get it as your main information it will have huge disadvantage for you. All of those possibilities will not happen in you if you take Mechatronics and Intelligent Systems for Off-road Vehicles as the daily resource information.

Dan Morris:

This book untitled Mechatronics and Intelligent Systems for Off-road Vehicles to be one of several books in which best seller in this year, that is because when you read this book you can get a lot of benefit onto it. You will easily to buy this book in the book retailer or you can order it by means of online. The publisher of the book sells the e-book too. It makes you easier to read this book, since you can read this book in your Touch screen phone. So there is no reason for your requirements to past this e-book from your list.

Linda Gordon:

That e-book can make you to feel relax. That book Mechatronics and Intelligent Systems for Off-road Vehicles was colourful and of course has pictures on the website. As we know that book Mechatronics and Intelligent Systems for Off-road Vehicles has many kinds or category. Start from kids until teens. For example Naruto or Private eye Conan you can read and think that you are the character on there. Therefore , not at all of book are generally make you bored, any it can make you feel happy, fun and chill out. Try to choose the best book in your case and try to like reading that will.
