Arduino Home Automation Projects

Marco Schwartz

Arduino Home Automation Projects Marco Schwartz
Automate your home using the powerful Arduino platform

About This Book

- Interface home automation components with Arduino
- Automate your projects to communicate wirelessly using XBee, Bluetooth and WiFi
- Build seven exciting, instruction-based home automation projects with Arduino in no time

Who This Book Is For

If you want to build your own home automation systems wirelessly using the Arduino platform, this is the book for you. You will need to have some basic experience in Arduino and general programming languages, such as C and C++ to understand the projects in this book.

What You Will Learn

- Connect home automation sensors to the Arduino platform
- Use the XBee technology to build low-power wireless motion sensors
- Interface a relay with Arduino to control devices in your home
- Utilize Wi-Fi to control a lamp remotely
- Employ Bluetooth and Arduino to measure the temperature remotely
- Send energy consumption data to the cloud
- Hack an existing home automation device using Arduino

In Detail

The Arduino platform is used by more than one million people around the world to prototype electronic systems. It is the perfect platform to use to build home automation systems, as it allows you to build your own motion sensors, control lamps remotely, and control preexisting home automation devices. The Arduino platform also allows you to build wireless home automation systems using well-known technologies such as Bluetooth and Wi-Fi.

This book shows you how to use the Arduino tiny microboard to live like a king. The book covers several projects you can perform using the Arduino platform. The first few projects comprise the basics of home automation, such as building a wireless motion sensor, controlling a lamp remotely, and building a Bluetooth temperature sensor. Then, this book dives into the Internet of Things, helping you get a clear understanding of how to send measured data to the cloud. The book will wrap up by showing you how to communicate and control an existing device and build your own home automation system.

From reader reviews:

Dane People:

The guide untitled Arduino Home Automation Projects is the guide that recommended to you to read. You can see the quality of the guide content that will be shown to a person. The language that article author use to explained their ideas are easily to understand. The article author was did a lot of analysis when write the book, and so the information that they share to you is absolutely accurate. You also might get the e-book of Arduino Home Automation Projects from the publisher to make you more enjoy free time.

Tammie Jackson:

The reason why? Because this Arduino Home Automation Projects is an unordinary book that the inside of the publication waiting for you to snap this but latter it will surprise you with the secret the idea inside. Reading this book close to it was fantastic author who write the book in such amazing way makes the content interior easier to understand, entertaining way but still convey the meaning thoroughly. So , it is good for you because of not hesitating having this anymore or you going to regret it. This phenomenal book will give you a lot of gains than the other book include such as help improving your skill and your critical thinking method. So , still want to delay having that book? If I were being you I will go to the guide store hurriedly.

John Razo:

Playing with family inside a park, coming to see the sea world or hanging out with friends is thing that usually you may have done when you have spare time, subsequently why you don't try matter that really opposite from that. 1 activity that make you not experiencing tired but still relaxing, trilling like on roller coaster you already been ride on and with addition info. Even you love Arduino Home Automation Projects, you can enjoy both. It is very good combination right, you still need to miss it? What kind of hang type is it? Oh can happen its mind hangout men. What? Still don't understand it, oh come on its identified as reading friends.

Christopher Palmer:

This Arduino Home Automation Projects is fresh way for you who has interest to look for some information because it relief your hunger info. Getting deeper you on it getting knowledge more you know or perhaps you who still having tiny amount of digest in reading this Arduino Home Automation Projects can be the light food to suit your needs because the information inside this kind of book is easy to get by simply anyone. These books create itself in the form that is certainly reachable by anyone, that's why I mean in the e-book type. People who think that in e-book form make them feel tired even dizzy this reserve is the answer. So you cannot find any in reading a publication especially this one. You can find what you are looking for. It should be here for you actually. So , don't miss that! Just read this e-book sort for your better life along with knowledge.
