Reading Complex Words: Cross-Language Studies (Neuropsychology and Cognition)

Reading Complex Words: Cross-Language Studies (Neuropsychology and Cognition)

This book brings together current research findings on the involvement of word-internal structure for the purpose of word reading (especially morphological structure). The central theme of reading complex words is approached from several angles, such that the chapters span a wide variety of topics where this issue is important. It is a valuable resource for all researchers studying the mental lexicon and to those who teach advanced courses in the psychology of language.
