Experimenting with AVR Microcontrollers (Technology in Action)

Alan Trevennor

Experimenting with AVR Microcontrollers (Technology in Action) Alan Trevennor

AVR is the brain that runs Arduino, but you don't need the whole Arduino board to do fun projects. *Experimenting with AVR Microcontrollers*, from *Practical AVR Microcontrollers*, shows you how to create a spiffy set of projects that you can build to learn more about electronics, about AVR, and just to generate new ideas for your own projects.

Alan Trevennor will show you how to create a secret panel project, a gadget to drive your pets crazy, a hallway lighting system, and even a small home automation network.

What you'll learn

- How to create an illuminated secret panel
- How to create visual effects with AVR
- How to create a waterfall-like lighting system
- How to set up a small home automation network

Who this book is for

Electronics hobbyists, Arduino fans, and any maker who wants to try some fun ideas with AVR.

From reader reviews:

Bethany Eng:

Book is written, printed, or created for everything. You can learn everything you want by a book. Book has a different type. As we know that book is important point to bring us around the world. Beside that you can your reading expertise was fluently. A book Experimenting with AVR Microcontrollers (Technology in Action) will make you to be smarter. You can feel a lot more confidence if you can know about every thing. But some of you think this open or reading some sort of book make you bored. It isn't make you fun. Why they could be thought like that? Have you in search of best book or ideal book with you?

Deborah Oneal:

The actual book Experimenting with AVR Microcontrollers (Technology in Action) will bring one to the new experience of reading some sort of book. The author style to explain the idea is very unique. If you try to find new book to learn, this book very appropriate to you. The book Experimenting with AVR Microcontrollers (Technology in Action) is much recommended to you to learn. You can also get the e-book through the official web site, so you can quicker to read the book.

Martin Thomas:

Do you really one of the book lovers? If yes, do you ever feeling doubt when you find yourself in the book store? Aim to pick one book that you find out the inside because don't assess book by its cover may doesn't work this is difficult job because you are scared that the inside maybe not seeing that fantastic as in the outside appearance likes. Maybe you answer may be Experimenting with AVR Microcontrollers (Technology in Action) why because the amazing cover that make you consider in regards to the content will not disappoint anyone. The inside or content is usually fantastic as the outside as well as cover. Your reading sixth sense will directly direct you to pick up this book.

Catherine Kuntz:

Reading a book being new life style in this year; every people loves to study a book. When you go through a book you can get a large amount of benefit. When you read guides, you can improve your knowledge, due to the fact book has a lot of information on it. The information that you will get depend on what kinds of book that you have read. If you need to get information about your examine, you can read education books, but if you act like you want to entertain yourself read a fiction books, such us novel, comics, and also soon. The Experimenting with AVR Microcontrollers (Technology in Action) provide you with a new experience in examining a book.
