The Role of the Chemical Sciences in Finding Alternatives to Critical Resources: A Workshop

Summary Douglas Friedman, Tina Masciangioli, Steve Olson, Chemical Sciences Roundtable, Board on Chemical Sciences and Technology, Division on Earth and Life Studies, National Research Council

The Chemical Sciences Roundtable (CSR) was established in 1997 by the National Research Council (NRC). It provides a science oriented apolitical forum for leaders in the chemical sciences to discuss chemistry-related issues affecting government, industry, and universities. Organized by the National Research Council's Board on Chemical Sciences and Technology, the CSR aims to strengthen the chemical sciences by fostering communication among the people and organizations - spanning industry, government, universities, and professional associations - involved with the chemical enterprise. One way it does this is by organizing workshops that address issues in chemical science and technology that require national attention.

In September 2011, the CSR organized a workshop on the topic, "The Role of Chemical Sciences in Finding Alternatives to Critical Resources." The one-and-a-half-day workshop addressed key topics, including the economic and political matrix, the history of societal responses to key mineral and material shortages, the applications for and properties of existing minerals and materials, and the chemistry of possible replacements. The workshop featured several presentations highlighting the importance of critical nonfuel mineral and material resources in history, catalysis, agriculture, and electronic, magnetic, and optical applications.

The Role of the Chemical Sciences in Finding Alternatives to Critical Resources: A Workshop Summary explains the presentations and discussions that took place at the workshop. In accordance with the policies of the NRC, the workshop did not attempt to establish any conclusions or recommendations about needs and future directions, focusing instead on issues identified by the speakers.

From reader reviews:

Richard Fentress:

Playing with family within a park, coming to see the water world or hanging out with close friends is thing that usually you might have done when you have spare time, and then why you don't try thing that really opposite from that. Just one activity that make you not feeling tired but still relaxing, trilling like on roller coaster you already been ride on and with addition details. Even you love The Role of the Chemical Sciences in Finding Alternatives to Critical Resources: A Workshop Summary, you are able to enjoy both. It is excellent combination right, you still want to miss it? What kind of hang-out type is it? Oh occur its mind hangout people. What? Still don't buy it, oh come on its identified as reading friends.

George Miller:

Don't be worry in case you are afraid that this book will probably filled the space in your house, you can have it in e-book means, more simple and reachable. This specific The Role of the Chemical Sciences in Finding Alternatives to Critical Resources: A Workshop Summary can give you a lot of close friends because by you looking at this one book you have matter that they don't and make you actually more like an interesting person. This specific book can be one of one step for you to get success. This e-book offer you information that maybe your friend doesn't recognize, by knowing more than additional make you to be great men and women. So , why hesitate? Let me have The Role of the Chemical Sciences in Finding Alternatives to Critical Resources: A Workshop Summary.

Theresa Braun:

You will get this The Role of the Chemical Sciences in Finding Alternatives to Critical Resources: A Workshop Summary by browse the bookstore or Mall. Merely viewing or reviewing it can to be your solve issue if you get difficulties to your knowledge. Kinds of this guide are various. Not only simply by written or printed but also can you enjoy this book by e-book. In the modern era such as now, you just looking by your mobile phone and searching what their problem. Right now, choose your personal ways to get more information about your reserve. It is most important to arrange you to ultimately make your knowledge are still update. Let's try to choose right ways for you.

Irving Tarkington:

What is your hobby? Have you heard that question when you got learners? We believe that that concern was given by teacher to their students. Many kinds of hobby, Everybody has different hobby. And you also know that little person like reading or as reading through become their hobby. You must know that reading is very important along with book as to be the factor. Book is important thing to incorporate you knowledge, except your personal teacher or lecturer. You get good news or update about something by book. Different

categories of books that can you choose to use be your object. One of them is actually The Role of the Chemical Sciences in Finding Alternatives to Critical Resources: A Workshop Summary.
