Manipulative Therapien der Integrativen Medizin: Akupunktur, Akupressur, Neuraltherapie (German Edition) Hubertus R. Hommel

Wissenschaftlicher Aufsatz aus dem Jahr 2007 im Fachbereich Medizin - Alternative Medizin, , 40 Quellen im Literaturverzeichnis, Sprache: Deutsch, Abstract: Der Begriff „Manipulation“ steht im Zusammenhang der lateinischen „manus“ für „Hand“, im mittelalterlichen Latein entstand nach einer Heiligen-Legende das Verb „manipulare“ im Sinne des Führens eines Blinden an der Hand. Im frankophonen Raum entwickelten sich die heute verwendeten Sinngebungen. Diese unterliegen allerdings, trotz damit verbundenen positiven Vorstellungen in der Ausübung praktischer Tätigkeiten in kunstgerechter Handhabung, selbst im themenfreien Raum einer grundsätzlich negativen Grundbewertung. Solche pauschal pejorative Beurteilungen beruhen vor allem auf den vielfältigen, teils historischen Erfahrungen verschiedener Kulturen und Zivilisationen, in denen über gezielte Einflussnahme die Durchsetzung der Interessen Einzelner der sozialen und personalen Autonomie einer Gemeinschaft übergeordnet werden. Aus diesen einseitigen, intensiven, meistens „indirekten“ Beeinflussungen in der Steuerung und Prägung des Denkens, Fühlens und Verhaltens können restriktive Einschränkungen der individuellen Lebensführung resultieren, um sich schließlich auf der biopsychosozialen Ebene des jeweils Betroffenen zu manifestieren. Dessen ungeachtet unterliegt das tägliche Leben zur Meinungsbildung und in der Kommunikation ohnehin permanent verschiedenen, weniger offensichtlichen Einflüssen. Grundsätzlich ist jegliches Weltbild manipulativ gestaltet, die medialen Informationen über Sprache, Schrift und Bilder vermitteln nur Ausschnitte einer Realität, die, gegebenenfalls in gegenseitiger Kommunikation bestärkt, zu subjektiven, emotional induzierten Blickwinkeln und Verhaltensweisen führen. Positive Erkenntnisse manifestieren sich ebenfalls über Kommunikation. Generell können Einflussnahmen authentische Individualitäten beeinträchtigen, indem sie sämtliche Lebensbereiche erfassen, haben sie allerdings Normalitätscharakter.
