## **Mathematical and Computational Models for Congestion Charging: 101 (Applied Optimization)**

Siriphong Lawphongpanich, Donald Hearn, Michael J. Smith

Although transportation economists have advocated the tolling of urban streets as a mechanism for controlling congestion and managing travel demands for over 50 years, it is only recently that this idea has become practical. When compared to the alternative of building more roads, congestion pricing - in particular via electronic tolling - is attractive and has been adopted in countries around the world. Recent implementations in London, Singapore, and various cities in Norway, as well as a number of projects in the United States, have been judged successful. This book presents rigorous treatments of issues related to congestion pricing. The chapters describe recent advances in areas such as mathematical and computational models for predicting traffic congestion, determining when, where, and how much to levy tolls, and analyzing the impact of tolls on transportation systems. The analyses and methodologies developed in this book provide: - Mechanisms that aid in determining and comparing congestion pricing schemes - Methodologies for evaluating the efficiency of existing and proposed congestion pricing schemes - A means to predict the impact of pricing on urban transportation systems - Information essential to the financial and political success of congestion pricing programs.

### **From reader reviews:**

#### **Jeffrey Primo:**

Here thing why that Mathematical and Computational Models for Congestion Charging: 101 (Applied Optimization) are different and trusted to be yours. First of all looking at a book is good however it depends in the content than it which is the content is as tasty as food or not. Mathematical and Computational Models for Congestion Charging: 101 (Applied Optimization) giving you information deeper as different ways, you can find any e-book out there but there is no book that similar with Mathematical and Computational Models for Congestion Charging: 101 (Applied Optimization). It gives you thrill examining journey, its open up your current eyes about the thing this happened in the world which is perhaps can be happened around you. It is possible to bring everywhere like in playground, café, or even in your method home by train. In case you are having difficulties in bringing the imprinted book maybe the form of Mathematical and Computational Models for Congestion Charging: 101 (Applied Optimization) in e-book can be your choice.

#### **Shalon Fisk:**

The book untitled Mathematical and Computational Models for Congestion Charging: 101 (Applied Optimization) is the guide that recommended to you to read. You can see the quality of the reserve content that will be shown to anyone. The language that article author use to explained their ideas are easily to understand. The writer was did a lot of exploration when write the book, and so the information that they share to your account is absolutely accurate. You also will get the e-book of Mathematical and Computational Models for Congestion Charging: 101 (Applied Optimization) from the publisher to make you much more enjoy free time.

#### **Yvonne Matz:**

Are you kind of active person, only have 10 as well as 15 minute in your day to upgrading your mind proficiency or thinking skill perhaps analytical thinking? Then you have problem with the book when compared with can satisfy your limited time to read it because pretty much everything time you only find guide that need more time to be examine. Mathematical and Computational Models for Congestion Charging: 101 (Applied Optimization) can be your answer mainly because it can be read by you actually who have those short time problems.

#### **Irvin Ashbaugh:**

Reading a book to become new life style in this yr; every people loves to read a book. When you examine a book you can get a large amount of benefit. When you read books, you can improve your knowledge, simply because book has a lot of information upon it. The information that you will get depend on what sorts of book that you have read. If you need to get information about your study, you can read education books, but if you want to entertain yourself look for a fiction books, this sort of us novel, comics, as well as soon. The Mathematical and Computational Models for Congestion Charging: 101 (Applied Optimization) provide you

with a new experience in looking at a book.
