## **Applying Computational Intelligence: How to Create Value** Arthur Kordon

In theory, there is no difference between theory and practice. But, in practice, there is. Jan L. A. van de Snepscheut The flow of academic ideas in the area of computational intelligence has penetrated industry with tremendous speed and persistence. Thousands of applications have proved the practical potential of fuzzy logic, neural networks, evolutionary computation, swarm intelligence, and intelligent agents even before their theoretical foundation is completely understood. And the popularity is rising. Some software vendors have pronounced the new machine learning gold rush to “Transfer Data into Gold”. New buzzwords like “data mining”, “genetic algorithms”, and “swarm optimization” have enriched the top executives’ vocabulary to make them look more “visionary” for the 21st century. The phrase “fuzzy math” became political jargon after being used by US President George W. Bush in one of the election debates in the campaign in 2000. Even process operators are discussing the performance of neural networks with the same passion as the performance of the Dallas Cowboys. However, for most of the engineers and scientists introducing computational intelligence technologies into practice, looking at the growing number of new approaches, and understanding their theoretical principles and potential for value creation becomes a more and more difficult task.

### **From reader reviews:**

#### **James Shaw:**

What do you in relation to book? It is not important along with you? Or just adding material when you really need something to explain what the one you have problem? How about your time? Or are you busy man or woman? If you don't have spare time to accomplish others business, it is give you a sense of feeling bored faster. And you have spare time? What did you do? Every individual has many questions above. They have to answer that question since just their can do that. It said that about reserve. Book is familiar in each person. Yes, it is suitable. Because start from on kindergarten until university need this Applying Computational Intelligence: How to Create Value to read.

#### **Gerardo Whittaker:**

In this 21st century, people become competitive in each and every way. By being competitive now, people have do something to make these individuals survives, being in the middle of the crowded place and notice by simply surrounding. One thing that oftentimes many people have underestimated the item for a while is reading. Yeah, by reading a e-book your ability to survive improve then having chance to stay than other is high. To suit your needs who want to start reading some sort of book, we give you this Applying Computational Intelligence: How to Create Value book as starter and daily reading book. Why, because this book is more than just a book.

#### **Leslie Bennett:**

Do you considered one of people who can't read pleasurable if the sentence chained inside the straightway, hold on guys this aren't like that. This Applying Computational Intelligence: How to Create Value book is readable by you who hate the straight word style. You will find the info here are arrange for enjoyable reading through experience without leaving also decrease the knowledge that want to deliver to you. The writer regarding Applying Computational Intelligence: How to Create Value content conveys the idea easily to understand by most people. The printed and e-book are not different in the information but it just different available as it. So , do you nevertheless thinking Applying Computational Intelligence: How to Create Value is not loveable to be your top listing reading book?

#### **Brenda Cornell:**

Is it anyone who having spare time and then spend it whole day by means of watching television programs or just telling lies on the bed? Do you need something totally new? This Applying Computational Intelligence: How to Create Value can be the answer, oh how comes? A book you know. You are so out of date, spending your extra time by reading in this completely new era is common not a geek activity. So what these publications have than the others?
