## **Relativity for Everyone: How Space-Time Bends** Kurt Fischer

This book explains the theory of special and general relativity in detail, without digressions such as information on Einstein's life or the historical background. However, complicated calculations are replaced with figures and thought experiments, the text being formulated in such a way that the reader will be able to understand the gist intuitively. The first part of the book focuses on the essentials of special relativity. Explanations are provided of the famous equivalence between mass and energy and of why Einstein was able to use the theory of electrodynamics as a template for his "electrodynamics of moving bodies", simply because besides the speed of light, the electric charge itself is also absolute, leading to the relativity of other physical quantities. General relativity is then introduced, mainly with the help of thought experiments. Reference is made to the previously introduced special relativity and the equivalence principle and, using many figures, it is explained how space-time is bending under gravity. The climax of the book comes with the Einstein equations of gravity that describe the way in which matter bends space-time. The reader is shown how to obtain the famous Schwarzschild solution. There follows a numerically correct and yet intuitive explanation of the classic effects such as light bending or the movement of the perihelion. The book concludes by explaining the Friedmann model of the big bang and why the theory of gravity does not fit with quantum theory.

### **From reader reviews:**

#### **Carolina Jones:**

This book untitled Relativity for Everyone: How Space-Time Bends to be one of several books in which best seller in this year, this is because when you read this book you can get a lot of benefit into it. You will easily to buy this particular book in the book retailer or you can order it by means of online. The publisher of this book sells the e-book too. It makes you quickly to read this book, as you can read this book in your Cell phone. So there is no reason to you personally to past this e-book from your list.

#### **Belinda Kirwin:**

Many people spending their time period by playing outside having friends, fun activity with family or just watching TV all day every day. You can have new activity to invest your whole day by reading a book. Ugh, think reading a book can really hard because you have to accept the book everywhere? It okay you can have the e-book, taking everywhere you want in your Cell phone. Like Relativity for Everyone: How Space-Time Bends which is having the e-book version. So , try out this book? Let's notice.

#### **Nicole Dilbeck:**

That book can make you to feel relax. This specific book Relativity for Everyone: How Space-Time Bends was colourful and of course has pictures on the website. As we know that book Relativity for Everyone: How Space-Time Bends has many kinds or genre. Start from kids until teenagers. For example Naruto or Investigator Conan you can read and think that you are the character on there. Therefore , not at all of book tend to be make you bored, any it makes you feel happy, fun and relax. Try to choose the best book for yourself and try to like reading in which.

#### **Denise Wentzel:**

A lot of publication has printed but it is unique. You can get it by web on social media. You can choose the most beneficial book for you, science, comic, novel, or whatever through searching from it. It is called of book Relativity for Everyone: How Space-Time Bends. Contain your knowledge by it. Without departing the printed book, it can add your knowledge and make anyone happier to read. It is most important that, you must aware about guide. It can bring you from one spot to other place.
