Fault Diagnosis and Fault-Tolerant Control Strategies for Non-Linear Systems: Analytical and Soft Computing Approaches: 266 (Lecture Notes in Electrical Engineering) Marcin Witczak

This book presents selected fault diagnosis and fault-tolerant control strategies for non-linear systems in a unified framework. In particular, starting from advanced state estimation strategies up to modern soft computing, the discrete-time description of the system is employed Part I of the book presents original research results regarding state estimation and neural networks for robust fault diagnosis. Part II is devoted to the presentation of integrated fault diagnosis and fault-tolerant systems. It starts with a general fault-tolerant control framework, which is then extended by introducing robustness with respect to various uncertainties. Finally, it is shown how to implement the proposed framework for fuzzy systems described by the well-known Takagi–Sugeno models.

This research monograph is intended for researchers, engineers, and advanced postgraduate students in control and electrical engineering, computer science, as well as mechanical and chemical engineering.

From reader reviews:

Fernando Levering:

As people who live in the actual modest era should be upgrade about what going on or details even knowledge to make these keep up with the era that is always change and progress. Some of you maybe can update themselves by reading through books. It is a good choice for you personally but the problems coming to an individual is you don't know which you should start with. This Fault Diagnosis and Fault-Tolerant Control Strategies for Non-Linear Systems: Analytical and Soft Computing Approaches: 266 (Lecture Notes in Electrical Engineering) is our recommendation so you keep up with the world. Why, because this book serves what you want and want in this era.

Angelina Rone:

Now a day folks who Living in the era everywhere everything reachable by match the internet and the resources inside it can be true or not require people to be aware of each info they get. How a lot more to be smart in getting any information nowadays? Of course the answer is reading a book. Reading a book can help people out of this uncertainty Information specially this Fault Diagnosis and Fault-Tolerant Control Strategies for Non-Linear Systems: Analytical and Soft Computing Approaches: 266 (Lecture Notes in Electrical Engineering) book because book offers you rich details and knowledge. Of course the knowledge in this book hundred pct guarantees there is no doubt in it as you know.

Betty Giuliani:

The particular book Fault Diagnosis and Fault-Tolerant Control Strategies for Non-Linear Systems: Analytical and Soft Computing Approaches: 266 (Lecture Notes in Electrical Engineering) has a lot associated with on it. So when you read this book you can get a lot of profit. The book was compiled by the very famous author. Mcdougal makes some research just before write this book. This book very easy to read you will get the point easily after scanning this book.

Jill Beery:

Beside that Fault Diagnosis and Fault-Tolerant Control Strategies for Non-Linear Systems: Analytical and Soft Computing Approaches: 266 (Lecture Notes in Electrical Engineering) in your phone, it may give you a way to get more close to the new knowledge or facts. The information and the knowledge you might got here is fresh from oven so don't possibly be worry if you feel like an aged people live in narrow commune. It is good thing to have Fault Diagnosis and Fault-Tolerant Control Strategies for Non-Linear Systems: Analytical and Soft Computing Approaches: 266 (Lecture Notes in Electrical Engineering) because this book offers for you readable information. Do you often have book but you seldom get what it's all about. Oh come on, that will not end up to happen if you have this inside your hand. The Enjoyable set up here cannot be questionable, like treasuring beautiful island. So do you still want to miss that? Find this book and also read

it from currently!
