Command and Control: The Sociotechnical Perspective (Human Factors in Defence) Daniel P, Dr Jenkins, Guy H, Dr Walker, Neville A, Professor Stanton, Paul M, Professor Salmon

Military command and control is not merely evolving, it is co-evolving. Technology is creating new opportunities for different types of command and control, and new types of command and control are creating new aspirations for technology. The question is how to manage this process, how to achieve a jointly optimised blend of socio and technical and create the kind of agility and self-synchronisation that modern forms of command and control promise. The answer put forward in this book is to re-visit sociotechnical systems theory. In doing so, the problems of 21st century command and control can be approached from an alternative, multi-disciplinary and above all human-centred perspective.

Human factors (HF) is also co-evolving. The traditional conception of the field is to serve as a conduit for knowledge between engineering and psychology yet 21st century command and control presents an altogether different challenge. Viewing military command and control through the lens of sociotechnical theory forces us to confront difficult questions about the non-linear nature of people and technology: technology is changing, from platform centric to network centric; the interaction with that technology is changing, from prescribed to exploratory; and complexity is increasing, from behaviour that is linear to that which is emergent. The various chapters look at this transition and draw out ways in which sociotechnical systems theory can help to understand it.

The sociotechnical perspective reveals itself as part of a conceptual toolkit through which military command and control can be transitioned, from notions of bureaucratic, hierarchical ways of operating to the devolved, agile, self-synchronising behaviour promised by modern forms of command and control like Network Enabled Capability (NEC). Sociotechnical system theory brings with it a sixty year legacy of practical application and this real-world grounding in business process re-engineering underlies the entire book. An attempt has been made to bring a set of sometimes abstract (but no less useful) principles down to the level of easy examples, design principles, evaluation criteria and actionable models. All of these are based on an extensive review of the current state of the art, new sociotechnical/NEC studies conducted by the authors, and insights derived from field studies of real-life command and control. Time and again, what emerges is a realisation that the most agile, self-synchronising component of all in command and control settings is the human.

From reader reviews:

Loris Beal:

Why don't make it to be your habit? Right now, try to ready your time to do the important work, like looking for your favorite guide and reading a publication. Beside you can solve your condition; you can add your knowledge by the guide entitled Command and Control: The Sociotechnical Perspective (Human Factors in Defence). Try to the actual book Command and Control: The Sociotechnical Perspective (Human Factors in Defence) as your good friend. It means that it can to be your friend when you experience alone and beside associated with course make you smarter than before. Yeah, it is very fortunate for you personally. The book makes you a lot more confidence because you can know everything by the book. So , we should make new experience along with knowledge with this book.

Rigoberto Stansell:

Book will be written, printed, or outlined for everything. You can understand everything you want by a reserve. Book has a different type. As we know that book is important thing to bring us around the world. Close to that you can your reading expertise was fluently. A reserve Command and Control: The Sociotechnical Perspective (Human Factors in Defence) will make you to end up being smarter. You can feel considerably more confidence if you can know about almost everything. But some of you think this open or reading some sort of book make you bored. It's not make you fun. Why they may be thought like that? Have you searching for best book or ideal book with you?

Donna Cauley:

In this age globalization it is important to someone to get information. The information will make a professional understand the condition of the world. The healthiness of the world makes the information easier to share. You can find a lot of personal references to get information example: internet, newspapers, book, and soon. You can observe that now, a lot of publisher that print many kinds of book. Often the book that recommended to your account is Command and Control: The Sociotechnical Perspective (Human Factors in Defence) this e-book consist a lot of the information in the condition of this world now. This specific book was represented how does the world has grown up. The terminology styles that writer require to explain it is easy to understand. The writer made some research when he makes this book. This is why this book appropriate all of you.

James Scott:

Reading a publication make you to get more knowledge from the jawhorse. You can take knowledge and information from the book. Book is composed or printed or created from each source that filled update of news. In this modern era like at this point, many ways to get information are available for an individual. From media social like newspaper, magazines, science publication, encyclopedia, reference book, story and

comic. You can add your understanding by that book. Are you hip to spend your spare time to spread out your book? Or just searching for the Command and Control: The Sociotechnical Perspective (Human Factors in Defence) when you desired it?
