Numerical Optimization (Springer Series in Operations Research and Financial Engineering)

Jorge Nocedal, Stephen Wright

Numerical Optimization (Springer Series in Operations Research and Financial Engineering) Jorge Nocedal, Stephen Wright

"Numerical Optimization" presents a comprehensive and up-to-date description of the most effective methods in continuous optimization. It responds to the growing interest in optimization in engineering, science, and business by focusing on the methods that are best suited to practical problems. Drawing on their experiences in teaching, research, and consulting, the authors have produced a textbook that will be of interest to students and practitioners alike. Each chapter begins with the basic concepts and builds up gradually to the best techniques currently available. Because of the emphasis on practical methods, as well as the extensive illustrations and exercises, the book is accessible to a wide audience. It can be used as a graduate text in engineering, operations research, mathematics, computer science, and business. It also serves as a handbook for researchers and practitioners in the field. Above all, the authors have strived to produce a text that is pleasant to read, informative, and rigorous - one that reveals both the beautiful nature of the discipline and its practical side.

MMOR, Mathematical Methods of Operations Research, 2001 observes: "The book looks very suitable to be used in an graduate-level course in optimization for students in mathematics, operations research, engineering, and others. Moreover, it seems to be very helpful to do some self-studies in optimization, to complete own knowledge and can be a source of new ideas...I recommend this excellent book to everyone who is interested in optimization problems."

From reader reviews:

Benjamin French:

Information is provisions for those to get better life, information these days can get by anyone in everywhere. The information can be a know-how or any news even a concern. What people must be consider any time those information which is in the former life are hard to be find than now is taking seriously which one is acceptable to believe or which one the particular resource are convinced. If you obtain the unstable resource then you buy it as your main information you will see huge disadvantage for you. All those possibilities will not happen within you if you take Numerical Optimization (Springer Series in Operations Research and Financial Engineering) as the daily resource information.

Wade Diaz:

This Numerical Optimization (Springer Series in Operations Research and Financial Engineering) is great guide for you because the content which can be full of information for you who also always deal with world and possess to make decision every minute. This specific book reveal it facts accurately using great arrange word or we can claim no rambling sentences in it. So if you are read this hurriedly you can have whole details in it. Doesn't mean it only provides you with straight forward sentences but difficult core information with attractive delivering sentences. Having Numerical Optimization (Springer Series in Operations Research and Financial Engineering) in your hand like having the world in your arm, data in it is not ridiculous one particular. We can say that no guide that offer you world in ten or fifteen tiny right but this book already do that. So , this is certainly good reading book. Hey there Mr. and Mrs. active do you still doubt that?

Paul Dubose:

Reading a book to become new life style in this season; every people loves to study a book. When you read a book you can get a large amount of benefit. When you read books, you can improve your knowledge, mainly because book has a lot of information on it. The information that you will get depend on what types of book that you have read. In order to get information about your analysis, you can read education books, but if you act like you want to entertain yourself look for a fiction books, these us novel, comics, and also soon. The Numerical Optimization (Springer Series in Operations Research and Financial Engineering) provide you with a new experience in reading a book.

Rose Rafferty:

On this era which is the greater man or woman or who has ability in doing something more are more important than other. Do you want to become among it? It is just simple way to have that. What you should do is just spending your time very little but quite enough to enjoy a look at some books. On the list of books in the top listing in your reading list is definitely Numerical Optimization (Springer Series in Operations Research and Financial Engineering). This book which can be qualified as The Hungry Hills can get you

closer in getting precious person. By looking up and review this guide you can get many advantages.
