**Disruptive Security Technologies with Mobile Code and Peer-to-Peer Networks** Clemson University, Holcombe D

The traditional fortress mentality of system security has proven ineffective to attacks by disruptive technologies. This is due largely to their reactive nature. Disruptive security technologies, on the other hand, are proactive in their approach to attacks. They allow systems to adapt to incoming threats, removing many of the vulnerabilities exploited by viruses and worms.

Disruptive Security Technologies With Mobile Code and Peer-To-Peer Networks provides a foundation for developing these adaptive systems by describing the design principles and the fundamentals of a new security paradigm embracing disruptive technologies. In order to provide a thorough grounding, the author covers such topics as mobile code, robust peer-to-peer networks, the multi-fractal model of network flow, security automata, dependability, quality of service, mobile code paradigms, code obfuscation, and distributed adaptation techniques as part of system security.

Adaptive systems allow network designers to gain equal footing with attackers. This complete guide combines a large body of literature into a single volume that is concise and up to date. With this book, computer scientists, programmers, and electrical engineers, as well as students studying network design will dramatically enhance their systems' ability to overcome potential security threats.

### **From reader reviews:**

#### **Mamie Wilson:**

Within other case, little persons like to read book Disruptive Security Technologies with Mobile Code and Peer-to-Peer Networks. You can choose the best book if you love reading a book. Given that we know about how is important any book Disruptive Security Technologies with Mobile Code and Peer-to-Peer Networks. You can add knowledge and of course you can around the world by the book. Absolutely right, due to the fact from book you can realize everything! From your country until eventually foreign or abroad you will find yourself known. About simple issue until wonderful thing it is possible to know that. In this era, you can open a book or searching by internet device. It is called e-book. You should use it when you feel bored to go to the library. Let's read.

#### **Linda Hupp:**

The reserve with title Disruptive Security Technologies with Mobile Code and Peer-to-Peer Networks possesses a lot of information that you can understand it. You can get a lot of gain after read this book. This book exist new expertise the information that exist in this guide represented the condition of the world currently. That is important to yo7u to learn how the improvement of the world. This specific book will bring you within new era of the internationalization. You can read the e-book on your smart phone, so you can read this anywhere you want.

#### **Elaine West:**

The book untitled Disruptive Security Technologies with Mobile Code and Peer-to-Peer Networks contain a lot of information on it. The writer explains the woman idea with easy means. The language is very clear to see all the people, so do not worry, you can easy to read the idea. The book was written by famous author. The author will bring you in the new era of literary works. You can read this book because you can read more your smart phone, or device, so you can read the book inside anywhere and anytime. In a situation you wish to purchase the e-book, you can start their official web-site and also order it. Have a nice examine.

#### **Michael Clements:**

Reading a publication make you to get more knowledge from the jawhorse. You can take knowledge and information from a book. Book is composed or printed or illustrated from each source that will filled update of news. With this modern era like currently, many ways to get information are available for an individual. From media social just like newspaper, magazines, science publication, encyclopedia, reference book, new and comic. You can add your knowledge by that book. Isn't it time to spend your spare time to spread out your book? Or just looking for the Disruptive Security Technologies with Mobile Code and Peer-to-Peer Networks when you required it?
