Frontiers in Complex Dynamics: In Celebration of John Milnor's 80th Birthday (Princeton Mathematical Series) Araceli Bonifant, Misha Lyubich, Scott Sutherland

John Milnor, best known for his work in differential topology, K-theory, and dynamical systems, is one of only three mathematicians to have won the Fields medal, the Abel prize, and the Wolf prize, and is the only one to have received all three of the Leroy P. Steele prizes. In honor of his eightieth birthday, this book gathers together surveys and papers inspired by Milnor's work, from distinguished experts examining not only holomorphic dynamics in one and several variables, but also differential geometry, entropy theory, and combinatorial group theory. The book contains the last paper written by William Thurston, as well as a short paper by John Milnor himself. Introductory sections put the papers in mathematical and historical perspective, color figures are included, and an index facilitates browsing. This collection will be useful to students and researchers for decades to come.

The contributors are Marco Abate, Marco Arizzi, Alexander Blokh, Thierry Bousch, Xavier Buff, Serge Cantat, Tao Chen, Robert Devaney, Alexandre Dezotti, Tien-Cuong Dinh, Romain Dujardin, Hugo García-Compeán, William Goldman, Rotislav Grigorchuk, John Hubbard, Yunping Jiang, Linda Keen, Jan Kiwi, Genadi Levin, Daniel Meyer, John Milnor, Carlos Moreira, Vincente Muñoz, Viet-Anh Nguyễn, Lex Oversteegen, Ricardo Pérez-Marco, Ross Ptacek, Jasmin Raissy, Pascale Roesch, Roberto Santos-Silva, Dierk Schleicher, Nessim Sibony, Daniel Smania, Tan Lei, William Thurston, Vladlen Timorin, Sebastian van Strien, and Alberto Verjovsky.

From reader reviews:

Davis Miller:

Why don't make it to become your habit? Right now, try to ready your time to do the important action, like looking for your favorite book and reading a guide. Beside you can solve your trouble; you can add your knowledge by the reserve entitled Frontiers in Complex Dynamics: In Celebration of John Milnor's 80th Birthday (Princeton Mathematical Series). Try to make the book Frontiers in Complex Dynamics: In Celebration of John Milnor's 80th Birthday (Princeton Mathematical Series) as your buddy. It means that it can to get your friend when you sense alone and beside that of course make you smarter than ever. Yeah, it is very fortunated in your case. The book makes you a lot more confidence because you can know almost everything by the book. So , we need to make new experience in addition to knowledge with this book.

James Brier:

The reserve untitled Frontiers in Complex Dynamics: In Celebration of John Milnor's 80th Birthday (Princeton Mathematical Series) is the e-book that recommended to you you just read. You can see the quality of the reserve content that will be shown to a person. The language that creator use to explained their ideas are easily to understand. The writer was did a lot of analysis when write the book, therefore the information that they share to you is absolutely accurate. You also might get the e-book of Frontiers in Complex Dynamics: In Celebration of John Milnor's 80th Birthday (Princeton Mathematical Series) from the publisher to make you considerably more enjoy free time.

John Collins:

Playing with family within a park, coming to see the water world or hanging out with buddies is thing that usually you have done when you have spare time, after that why you don't try factor that really opposite from that. Just one activity that make you not experience tired but still relaxing, trilling like on roller coaster you are ride on and with addition of information. Even you love Frontiers in Complex Dynamics: In Celebration of John Milnor's 80th Birthday (Princeton Mathematical Series), you could enjoy both. It is fine combination right, you still would like to miss it? What kind of hangout type is it? Oh seriously its mind hangout men. What? Still don't have it, oh come on its referred to as reading friends.

Lola Behrendt:

Do you like reading a reserve? Confuse to looking for your best book? Or your book had been rare? Why so many question for the book? But just about any people feel that they enjoy for reading. Some people likes examining, not only science book but additionally novel and Frontiers in Complex Dynamics: In Celebration of John Milnor's 80th Birthday (Princeton Mathematical Series) or others sources were given knowledge for you. After you know how the truly great a book, you feel would like to read more and more. Science guide was created for teacher as well as students especially. Those ebooks are helping them to add their knowledge. In other case, beside science publication, any other book likes Frontiers in Complex Dynamics:

In Celebration of John Milnor's 80th Birthday (Princeton Mathematical Series) to make your spare time more colorful. Many types of book like here.
