**Maths for Chemists (Tutorial Chemistry Texts)** Graham Doggett, Martin Cockett

The two volumes of Maths for Chemists provide an excellent resource for all undergraduate chemistry students but are particularly focussed on the needs of students who may not have studied mathematics beyond GCSE level (or equivalent). The texts are introductory in nature and adopt a sympathetic approach for students who need support and understanding in working with the diverse mathematical tools required in a typical chemistry degree course. The early chapters of Maths for Chemists Volume I: Numbers, Functions and Calculus provide a succinct introduction to the important mathematical skills of algebraic manipulation, trigonometry, numbers, functions, units and the general grammar of maths. Later chapters build on these basic mathematical principles as a foundation for the development of differential and integral calculus. In spite of the introductory nature of this volume, some of the more important mathematical tools required in quantum chemistry are deliberately included, through a gradual introduction to, and development of, the concept of the eigenvalue problem. Ideal for the needs of undergraduate chemistry students, Tutorial Chemistry Texts is a major series consisting of short, single topic or modular texts concentrating on the fundamental areas of chemistry taught in undergraduate science courses. Each book provides a concise account of the basic principles underlying a given subject, embodying an independent-learning philosophy and including worked examples.

### **From reader reviews:**

#### **Carson McDonald:**

Do you really one of the book lovers? If yes, do you ever feeling doubt when you find yourself in the book store? Try to pick one book that you find out the inside because don't determine book by its handle may doesn't work the following is difficult job because you are scared that the inside maybe not because fantastic as in the outside seem likes. Maybe you answer is usually Maths for Chemists (Tutorial Chemistry Texts) why because the excellent cover that make you consider regarding the content will not disappoint you actually. The inside or content is usually fantastic as the outside or perhaps cover. Your reading 6th sense will directly guide you to pick up this book.

#### **Dale Perez:**

Many people spending their time period by playing outside together with friends, fun activity with family or just watching TV all day long. You can have new activity to enjoy your whole day by looking at a book. Ugh, do you think reading a book really can hard because you have to accept the book everywhere? It alright you can have the e-book, bringing everywhere you want in your Mobile phone. Like Maths for Chemists (Tutorial Chemistry Texts) which is having the e-book version. So , try out this book? Let's view.

#### **Thelma Brady:**

In this era which is the greater man or who has ability in doing something more are more precious than other. Do you want to become one of it? It is just simple solution to have that. What you must do is just spending your time not much but quite enough to possess a look at some books. On the list of books in the top list in your reading list will be Maths for Chemists (Tutorial Chemistry Texts). This book which can be qualified as The Hungry Inclines can get you closer in turning out to be precious person. By looking upwards and review this publication you can get many advantages.

#### **Ariane Gray:**

A lot of guide has printed but it takes a different approach. You can get it by world wide web on social media. You can choose the most beneficial book for you, science, comedy, novel, or whatever by simply searching from it. It is named of book Maths for Chemists (Tutorial Chemistry Texts). You can include your knowledge by it. Without departing the printed book, it may add your knowledge and make you happier to read. It is most crucial that, you must aware about publication. It can bring you from one destination to other place.
