**Generalized Functions and Partial Differential Equations (Dover Books on Mathematics)** Avner Friedman

This self-contained treatment develops the theory of generalized functions and the theory of distributions, and it systematically applies them to solving a variety of problems in partial differential equations. A major portion of the text is based on material included in the books of L. Schwartz, who developed the theory of distributions, and in the books of Gelfand and Shilov, who deal with generalized functions of any class and their use in solving the Cauchy problem. In addition, the author provides applications developed through his own research.

Geared toward upper-level undergraduates and graduate students, the text assumes a sound knowledge of both real and complex variables. Familiarity with the basic theory of functional analysis, especially normed spaces, is helpful but not necessary. An introductory chapter features helpful background on topological spaces. Applications to partial differential equations include a treatment of the Cauchy problem, the Goursat problem, fundamental solutions, existence and differentiability of solutions of equations with constants, coefficients, and related topics. Supplementary materials include end-of-chapter problems, bibliographical remarks, and a bibliography.

### **From reader reviews:**

#### **Mark Hart:**

Book is to be different per grade. Book for children till adult are different content. As we know that book is very important for people. The book Generalized Functions and Partial Differential Equations (Dover Books on Mathematics) has been making you to know about other understanding and of course you can take more information. It is extremely advantages for you. The e-book Generalized Functions and Partial Differential Equations (Dover Books on Mathematics) is not only giving you considerably more new information but also to be your friend when you experience bored. You can spend your spend time to read your publication. Try to make relationship together with the book Generalized Functions and Partial Differential Equations (Dover Books on Mathematics). You never sense lose out for everything when you read some books.

#### **Elizabeth Frizzell:**

Reading a book can be one of a lot of exercise that everyone in the world enjoys. Do you like reading book therefore. There are a lot of reasons why people fantastic. First reading a e-book will give you a lot of new information. When you read a reserve you will get new information simply because book is one of several ways to share the information or perhaps their idea. Second, examining a book will make you actually more imaginative. When you examining a book especially fiction book the author will bring you to definitely imagine the story how the characters do it anything. Third, you can share your knowledge to others. When you read this Generalized Functions and Partial Differential Equations (Dover Books on Mathematics), you are able to tells your family, friends along with soon about yours book. Your knowledge can inspire average, make them reading a publication.

#### **Teresa Graham:**

Many people spending their time period by playing outside along with friends, fun activity with family or just watching TV the entire day. You can have new activity to pay your whole day by reading through a book. Ugh, do you think reading a book can really hard because you have to take the book everywhere? It ok you can have the e-book, taking everywhere you want in your Mobile phone. Like Generalized Functions and Partial Differential Equations (Dover Books on Mathematics) which is getting the e-book version. So , try out this book? Let's find.

#### **Lola Behrendt:**

Reading a e-book make you to get more knowledge from that. You can take knowledge and information from a book. Book is created or printed or descriptive from each source that will filled update of news. With this modern era like now, many ways to get information are available for you actually. From media social including newspaper, magazines, science guide, encyclopedia, reference book, story and comic. You can add your understanding by that book. Do you want to spend your spare time to open your book? Or just in search of the Generalized Functions and Partial Differential Equations (Dover Books on Mathematics) when you

necessary it?
