Siegfried Bosch

Algebraic Geometry and Commutative Algebra (Universitext) Siegfried Bosch
Algebraic geometry is a fascinating branch of mathematics that combines methods from both, algebra and geometry. It transcends the limited scope of pure algebra by means of geometric construction principles. Moreover, Grothendieck's schemes invented in the late 1950s allowed the application of algebraic-geometric methods in fields that formerly seemed to be far away from geometry, like algebraic number theory. The new techniques paved the way to spectacular progress such as the proof of Fermat's Last Theorem by Wiles and Taylor.The scheme-theoretic approach to algebraic geometry is explained for non-experts. More advanced readers can use the book to broaden their view on the subject. A separate part deals with the necessary prerequisites from commutative algebra. On a whole, the book provides a very accessible and self-contained introduction to algebraic geometry, up to a quite advanced level.Every chapter of the book is preceded by a motivating introduction with an informal discussion of the contents. Typical examples and an abundance of exercises illustrate each section. This way the book is an excellent solution for learning by yourself or for complementing knowledge that is already present. It can equally be used as a convenient source for courses and seminars or as supplemental literature.

From reader reviews:

Richard Poston:

As people who live in often the modest era should be change about what going on or facts even knowledge to make all of them keep up with the era that is certainly always change and move ahead. Some of you maybe may update themselves by reading through books. It is a good choice in your case but the problems coming to you is you don't know which you should start with. This Algebraic Geometry and Commutative Algebra (Universitext) is our recommendation to help you keep up with the world. Why, as this book serves what you want and want in this era.

Joanne Starks:

People live in this new moment of lifestyle always aim to and must have the time or they will get wide range of stress from both daily life and work. So , once we ask do people have time, we will say absolutely of course. People is human not really a huge robot. Then we consult again, what kind of activity are you experiencing when the spare time coming to you actually of course your answer will probably unlimited right. Then do you ever try this one, reading books. It can be your alternative inside spending your spare time, often the book you have read will be Algebraic Geometry and Commutative Algebra (Universitext).

Ellis Arnold:

Beside this kind of Algebraic Geometry and Commutative Algebra (Universitext) in your phone, it might give you a way to get nearer to the new knowledge or facts. The information and the knowledge you can got here is fresh from the oven so don't end up being worry if you feel like an old people live in narrow community. It is good thing to have Algebraic Geometry and Commutative Algebra (Universitext) because this book offers for your requirements readable information. Do you often have book but you do not get what it's about. Oh come on, that would not happen if you have this inside your hand. The Enjoyable blend here cannot be questionable, including treasuring beautiful island. Use you still want to miss that? Find this book and read it from at this point!

Brandi Johnson:

What is your hobby? Have you heard which question when you got college students? We believe that that problem was given by teacher to their students. Many kinds of hobby, Everyone has different hobby. Therefore you know that little person like reading or as reading become their hobby. You should know that reading is very important as well as book as to be the matter. Book is important thing to increase you knowledge, except your personal teacher or lecturer. You find good news or update regarding something by book. A substantial number of sorts of books that can you choose to adopt be your object. One of them is Algebraic Geometry and Commutative Algebra (Universitext).
