With new standards emphasizing higher-order thinking skills, students will have to demonstrate their ability to do far more than simply remember facts and procedures. But what's the best way for teachers to ensure that students have such skills? In this highly accessible guide, author Susan M. Brookhart shows how to do just that, by providing specific guidelines for designing targeted questions and tasks that align with standards and assess students' ability to think at higher levels.

Aided by dozens of examples across grade levels and subject areas, readers will learn how to

- * Take a student perspective and view assessment questions and tasks as "problems to solve."
- * Design multiple-choice questions that require higher-order thinking.
- * Understand the difference between "open" and "closed" questions and how to use open questions effectively.
- * Vary and control the features of performance assessment tasks, including cognitive level and difficulty, to target different thinking skills.
- * Manage the assessment of higher-order thinking within the larger context of teaching and learning.

Brookhart also provides an "idea bank" that teachers can use to jump-start their own thinking as they create assessments.
